PROFILE

Independent and meticulous web developer with over 2 years of experience in the front-end department concatenating the art of design with functional and object-oriented programming skills to deliver enthralling user interfaces with captivating responsiveness for immersive user experience. Recursively pushing variables into an array of abilities that already includes proficiency in HTML, CSS, JavaScript, jQuery and frameworks and/or libraries like React, Bootstrap, Material UI etc.

WORK/ENGAGEMENT HISTORY

Front End Developer @ Dufuna Code Camp – Lagos, Nigeria

October 2020 – Present

Voluntarily enrolled in this code camp after having been self-taught for a few months for the purpose of more education, team work experience and certification. Highlights include:

- Learning, unlearning, relearning and understanding simple and advanced techniques of web development
- Collaborating with other programmers on monthly hackathons to ensure the strengthening of team work capabilities and team productivity
- Performing bug fixes and code reviews
- Keeping abreast and updated with the latest in-use technologies

React Developer @ LearnerMeta Africa – Abuja, Nigeria

Remote/Contract/Freelancing

February 2020 – Present

- Assisting the startup in the development of PWA and foundation MVP
- Implementing the mobile-first approach to the construction of web pages
- Building stable, modular, maintainable and reusable code bases
- Creating responsive website designs/templates compatible with most browsers using modern CSS techniques and JavaScript libraries where applicable
- Recommending solutions for a user-friendly interface with the design team and ensuring such design implementation for performance and functionality intersection
